I urge the FCC to please REJECT the NAB's petition 04-160. Satellite radio is the People's radio. It is American's speaking with their wallets saying, I will pay for a service that I want. This service is providing a safety feature to its customers by allowing them up to minute weather and traffic. Why would anyone want that stopped? Only those who have a financial reason for them to stop. This is not right! The only people who have a right to request that a SERVICE, and also a safety feature of that service, be stopped, is the people who PAY for such a service. This is America and our voices speak loud and free when our rights are not respected!!
